

Project Management using the example of "Gotthard Base Tunnel" project

7/ 8 October 2020

Au Premier, Zurich Main Station

What awaits you:

Solid Project Management is like the oil in the gearbox of an engine. The better you plan and manage your projects, the smoother they will run, and the less time and money they will take.

Managing projects is a major factor in the success of each company. In order to be successful, the project environment must be analyzed clearly and specifically influenced using proven Project Management concepts and techniques.

Using the example of Project Management at "Gotthard Base Tunnel" project, state-of-the-art PM methods are presented to you according to the key objective "lessons learned".

**What you can expect:**

In this workshop you will get to know Project Management on the basis of a mega project. The PM methods acquired here can be applied to any other your projects.

After the workshop you will be able to introduce Project Management processes for your company or to optimize the existing Project Management processes.

Content of the workshops:

- Project and Project Management functions
- PM process methods at a glance
- Basics of large-scale Project Management
- Definition of scope and content of the Project Management
- PM processes and procedure for implementation
- Creation of a project structure organisation
- Control and processes in Project Management as life-cycle key objective
- Project closure

Who is addressed:

This workshop is suitable for young professionals in Project Management, for experienced Project Managers as refreshers as well as internal and external organizational Consultants from specialist departments who are directly or indirectly involved in projects.

At the workshop you will not only benefit from the inputs of an experienced Project Manager but also from the experiences of the other participants and thus expand your professional network.

About the speaker:

Michael Becker has been gained experiences in various national and international construction business for more than 25 years and, as former Head of Contract Management IG GBTS at "Gotthard Base Tunnel" project, worked for the client during the finalization of the shell construction and shell equipment phase in the Sedrun-Faido-Bodio lots. Michael Becker has obtained the certification as Certified Senior Project Manager IAPM and keeps abreast of the latest PM developments through regular further training in this field.
